

Live Production

Studio X

Provide concerts, stage, talk and game shows, sports, reality TV with real-time interactivity and fast turnaround. Capture, mix and replay the action your way for live.

Studio X

Studio X is one of the advanced products designed for demanding broadcast applications. It is particularly useful for multicamera ingest productions. It provides several functions, and can manage an unlimited number of channels and associated equipment. It also allows 'on the fly' editing and the convenient preparation of files for multicamera montages. The results are shorter production cycles and enriched content.

Application
