AP ENPS

Empowering tomorrow's newsrooms

ENPS is a system built and backed by journalists, for journalists. We want to help you create compelling stories at the speed of news, and the features of our system are designed to do just that.

INTEGRATION

COLLABORATION

MOBILITY

SUPPORT

Flexible

AP ENPS MOBILE Equip your team members with all the ENPS functionality they need, anywhere they need it. Our touch-friendly interface makes it easy to write stories on the go, access or upload content from the field, see real-time updates on breaking news, monitor assignments and rundowns, and communicate with co-workers. Get notifications straight to your device so you never miss a beat.

PAPER-FREE SCRIPTS Tablet Story Viewer allows anchors and reporters to edit, read and review stories directly from an iPad or Android tablet. Story changes are updated instantly, and rundown content gets cached so that the latest version of a script is always available.

INTEGRATION Connect with hundreds of different systems to unite all aspects of your broadcast and digital production workflow for all media types, from the field all the way through to air and archive. Plus, we integrate with the leading social platforms in the market.

Customizable

STORYBOARDS Use ENPS's collaborative workspaces to easily find and share information, media and updates on the day's big stories or ongoing events. Simply drag and drop the information you need from a storyboard into a story or output channel.

INDIVIDUAL WORKSPACE Customize your workspace to best fit your needs with our intuitive interface. Side-by-side editing windows make it easy and efficient to create multiple versions of a story for different platforms.

NAMING CONVENTIONS Improve speed and efficiency by creating a chain of consistency with content naming conventions that carry through from planning to publication.

Smart

SEARCH FEATURES Find all the content you need with a single search. One query pulls up text, video, graphics and archives from anywhere in your system, including across connected ENPS locations.

ALERT BAR Never miss breaking news with the alert bar at the top of your screen. Internal messages and urgent wires remain right where you need them.

SUPPORT Make the most of ENPS with 24/7 support from journalists, tech experts and trainers dedicated to your success. Our customers say it often: our support team is the best in the business.
