

“With pixstor we have a proven, highly resilient storage architecture upon which we can rely. Combine this with pixitmedia’s consultative approach, access to their workflow experts and 24/7 support services, we also have a responsive technology partner to help us reap the benefits and future possibilities of a software-defined environment.”

*David Travis
Red Bee Media*

pixstor
beyond storage

pixstor goes beyond storage, offering the consistency, performance and scale that teams in data intensive environments need to stay competitive.

A complete shared storage solution, purpose-built for demanding media requirements, offering guaranteed performance from disk to desktop. pixstor is a data-aware scale-out NAS platform that ensures your data is always available, precisely when and where you need it, so your teams can be more productive.

We’ve developed pixstor to support the entire media lifecycle from ingest and creation through to distribution and archive, providing significant benefits for the full spectrum of media-centric organisations. pixstor can overcome your data-hungry workflow challenges.

FEATURES

Powerful Search

Empower your team to move fast, search and extract data wherever it resides.

Collaboration

Seamless Artist-Anywhere collaboration to enable the power of ideas.

Cloud

Push button cloud deployment, and a unified experience whether on-premise, hybrid or in the public cloud.

Data Management

Smart and efficient data management from Sync, Disaster Recovery to intelligent file movement on a global scale.

Security

Protect your assets with security & audit compliance.

Admin & Analytics

Control your data and storage strategies. Predict and reduce your data costs.

AWARDS

- NAB Product of the Year 2019
- TVB Europe Best in Show Award 2019
- Broadcast Tech Innovation Awards 2019 Excellence in Virtualisation
- Post Magazine names pixstor Stand-Out New Product At NAB 2019
- Net Promoter Score, customer experience of 52% “truly excellent” (global avg 30)

Global Collaboration

- Enable smart global access to data
- Retain visibility across all storage regardless of location
- Ultra high-speed data transfer via cloud-provider networks
- Securely share work with third-party facilities and customers

Powerful Search

- Lightning fast search across cloud and on-premises
- Intuitive interface brings files closer to your teams
- Seamless out-of-the-box integration in your media pipeline, extendable to best fit your business needs
- Gain insights and extract additional value from your existing files
- Find assets faster via powerful search that learns about your content

**Deploy pixstor to the
Cloud in under 5 minutes**

“The performance of the system enables multiple workloads to run full pelt with no negative effect on the finishing editors, or graphic artists user experience. With pixstor running we can now confidently scale to take on multiple data-intensive projects at the same time.”

*Baren Lewis
Global Head of Integrated Advertising Technology, Framestore*

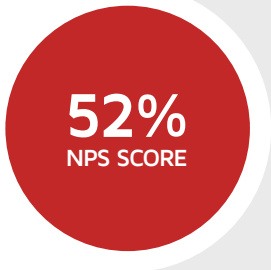

100% performance guaranteed at 99% capacity

Whereas other solutions lose performance due to fragmentation, we are so confident in our file system that we offer a performance guarantee up to 99% capacity for the lifetime of the solution.

Security

- Quickly deploy segregated NAS shares to provide compliance to even the most stringent studios and content owner’s security standards
- Maintain your performance across all storage tenants
- Empower system admins with granular control, performance dashboards and capacity analytics
- Help your studio infrastructure align with MPAA or TPN best practices

Our Support Services are unrivalled in the industry

Our customers operate in a 24/7 environment and therefore so does our support. Uniquely, pixitmedia provides a single point of contact for all support issues.

All hardware and software escalations are performed by our support engineers who engage directly with vendors or ISVs to speedily resolve any issues. We’ll do the chasing on your behalf so you can focus on what you do best.

Hybrid Cloud Solution

- Consolidate on-premise and cloud pipelines using a single namespace
- Support tens of thousands of CPU & GPU compute nodes
- Gain greater control of egress costs
- Leverage multi-region, multi-provider scalability
- Enable limitless capacity with object tiers
- Integrate with industry standard software such as Thinkbox Deadline, OpenCue and Autodesk ShotGrid (Shotgun)
- Simple deployment using cloud marketplace interface

Smart Data Management

- Industry-leading policy engine
- Intelligent tiering within the same namespace across cloud, file system, tape and third-party NAS devices
- Synchronous and Asynchronous Replication
- Disk driven data protection capabilities with pixstor Sync
- Snapshots and cloning support
- User-driven restore capabilities
- Anti-virus support
- Python and Rest API

Experience ngena in a Real-World Production Environment

The pixitmedia Lab at our UK headquarters is a dedicated facility showcasing the complete pixstor ecosystem, where you can test, collaborate and train with us in a real-world production environment.

We’ve invested in a full complement of legacy, current and leading-edge hardware, applications and tools to support a wide range of contexts and workflows for Media Production, Post-Production, Visual FX, Broadcast and Remote Editing, integrated with major cloud services including Google Cloud, Amazon Web Services and Azure.

About pixitmedia.

pixitmedia delivers seamless collaboration to enable the power of ideas.

Our purpose-built, software-defined storage and data solutions simplify the flow of data to connect an increasingly complex world.

Our aim is to deliver beyond expectations throughout all areas of our operation. We devise solutions that give customers both choice and freedom, our restless innovation constantly pushes boundaries and the unrivalled care and knowledge of our team ensure optimum performance and value. Customer success is at the heart of our business.

We have a dedicated in-house lab facility to guarantee the effectiveness of our solutions.

pixitmedia is privately-owned and headquartered in the UK, with offices in the USA and Germany.
