

G & L | **RNDFNK**

AUDIO
DISTRIBUTION
PLATFORM

Trusted by industry leaders

G&L is a managed service provider based in Germany that enables clients of every size to easily distribute their video and audio worldwide.

RNDFNK, G&L's initiative audio distribution platform, is used by broadcasters of all sizes: from small local radio stations to large media corporations and broadcasters. Setup is easy, all we require is access to your streams or audio files.

G&L is a proud member of Greening of Streaming - an international organisation created to reduce energy consumption in the streaming industry, and RadioDNS - a not-for-profit organisation that actively promotes the use of open technology standards to enable hybrid radio.

Product

- Live radio and on-demand audio
